

# MOUSTADRAF OUSSAMA

COMPUTER SCIENCE ENGINEER STUDENT

## ABOUT ME

Passionate about computer science in general, and especially software engineering, web development and app development.

As a student, I acquired a lot of skills for which I practice it by building my own projects.

## INTERNSHIP EXPERIENCES

- February 2022-June 2022 | **BEONTEK TECHNOLOGIES**, Agadir, Morocco  
*Web Development*

Built a platform E-Learning for Soft-Skills with the following technologies : **React, Spring, jQuery, MySQL and Tailwind**.

## PERSONAL PROJECTS

(All these projects can be seen in my Github page)

- E-Commerce of general products**  
Created by using : **Laravel, Bootstrap and jQuery**.
- E-Commerce of medical products**  
Created by using **Spring Framework, Java, jQuery and Bootstrap**.
- Portfolio**  
Created by using **React**.
- CSGO Market Analyzer**  
A desktop application which analyze Counter-Strike Global Offensive (CSGO) Market, and automate the process of determining profits of this market with efficiency.  
Uses **C++ Libraries** such as: **Boost, SQLite, ...**
- Regions Music**  
A mobile app which start some music dynamically according to your current region/zone.  
It lets the user to define its zone, and their music.  
Created by using **Flutter**, and it supports both **Android & iOS**.
